

Innovative approaches to education

This part consists of educational texts and the didactic tests. Students are supposed to learn how various types of power plants work. The study material can be used in a tuition process, supported by usage of ICT technology. New knowledge from the field of energy is offered to students through the new teaching method.

3.1 Nuclear power plants

3.2 Hydro power plants

3.3 Thermal power Plants

3.4 Wind power plants

3.5 Photovoltaic power plants
